1984

Crime Index Offense (Part I Crimes) increased from 258,014 in 1983 to 264,938 in 1984, an increase of 2.7%.

Violent Crimes increased 11.4% from 15,750 in 1983 to 17,539 in 1984.

- Murder and non-negligent homicides decreased 4.7% from 211 in 1983 to 201 in 1984.
- Rape increased 13.7% from 1897 in 1983 to 2156 in 1984.
- Robbery increased 16.4% from 4491 in 1983 to 5228 in 1984.
- Aggravated assault increased 8.8% from 9151 in 1983 to 9954 in 1984.

Property crime increased 2.1% from 242,264 in 1983 to 247,399 in 1984.

- Burglary increased 6.2% from 69,239 in 1983 to 73,499 in 1984.
- Larceny (theft) increased 0.6% from 160,448 in 1983 to 161,427 in 1984.
- Motor vehicle theft decreased 0.3% from 10,684 in 1983 to 10,649 in 1984.
- Arson decreased 3.6% from 1893 in 1983 to 1824 in 1984.

The value of property stolen in 1984 totaled $130,111,749.00, an increase of 11.2%, compared to $117,043,405.00 in 1983.

The value of property recovered in 1984 totaled $30,750,752.00 a decrease of 2.1%, compared to $31,398,389.00 in 1983.

Arrests totaled 168,485 in 1984 compared to 165,014 in 1983, for a 2.1% increase.

Three law enforcement officers were killed in the line of duty in 1984, compared to one in 1983.

Assaults on law enforcement officers totaled 1372 in 1984 compared to 1191 in 1983 for a 15.2% increase.

Law enforcement agencies employed 11,988 full-time employees in 1984, compared to 11,636 in 1983, for a 3.0% increase.

ACKNOWLEDGMENTS

CRIME IN WASHINGTON STATE 1984 was compiled from data submitted to the Washington Uniform Crime Reporting division of the Washington Association of Sheriffs and Police Chiefs by Washington Law Enforcement agencies during 1984. Estimated coverage is about 97.6% of the states population. The excellent cooperation of the participating agencies is appreciated and acknowledged.

Input and guidance from the Washington Association of Sheriffs and Police Chiefs Uniform Crime Reporting Advisory Committee is gratefully acknowledged.

INTRODUCTION

This is the fifth Annual Report of criminal offenses, arrests, law enforcement officers killed or assaulted, and full-time law enforcement employees produced by the Washington Uniform Crime Reporting program (WUCR). Funding for WUCR is provided by a contract agreed upon with the Washington State Criminal Justice Training Commission (CJTC). Administration of WUCR is the responsibility of the Washington Association of Sheriffs and Police Chiefs (WASPC). WUCR is unique in that it is the only state UCR program that is sponsored, administered and supported by an organization of contributing agency administrators, rather than a bureau or department of state government.

WASHINGTON UNIFORM CRIME REPORTING PROGRAM

Although the impetus for collecting nationwide crime information dates back to the 1890's, no ongoing program was initiated until the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was established in 1917. This committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity and has been joined in this responsibility by the committee on Crime Records of the National Sheriffs Association.

Data for **CRIME IN WASHINGTON STATE 1984** are compiled from monthly UCR reports submitted by individual law enforcement agencies throughout the State of Washington. WUCR was activated in October 1979, and began the collection of monthly reports from contributing agencies in January

1980. At the present time the UCR program is operated on a semi-manual and computerized basis. The computer program is designed to provide automated data input processing and provides various programs that are necessary for statistical purposes in the criminal justice system.

OBJECTIVES OF WASHINGTON'S UCR

Increasing attention has been focused on the problem of crime in our communities in recent years. Because of this attention, many segments of our population needs more complete information for a variety of reasons.

Citizens are understandably concerned about the possibility of becoming victims of crime, but may not know what the real probability is. Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment most efficiently to protect citizens and bring criminals to justice. Legislators need statewide information about crime in order to pass realistic laws that will increase the stability of our society. Researchers and planners need to know what is actually happening to predict trends and recommend changes.

The objectives of **CRIME IN WASHINGTON STATE 1984** are to implement and administer a uniform system of collecting crime and arrest statistical data from contributing law enforcement agencies in the State of Washington and present the information needed by each of these groups. This information will not in itself prevent crime, but it may encourage segments of society to understand the problem and to work together with law enforcement agencies to reduce crime through more effective

Additional objectives of **CRIME IN WASHINGTON STATE 1984** when compiled and evaluated are:

1. To identify the number of crimes reported by contributing agencies.
2. To identify the geographical distribution of reported offenses.
3. To determine whether or not reported crimes have increased or decreased.
4. To determine whether or not reported crimes have increased or decreased by population groups.
5. To determine the number of clearances and the clearance rate for reported offenses.
6. To determine the reported number of arrests by charge, age, sex and ethnic origin.
7. To determine the number of law enforcement officers assaulted and killed.
8. To determine the number of commissioned (sworn) and civilian law enforcement employees by sex.
9. To determine the rate per population group of commissioned (sworn) and civilian law enforcement employees.

CRIME FACTORS

Care should be taken in drawing conclusions and making decisions about problems based solely on crime and arrest data that is reported to WUCR. Factors relating to crime reporting practices, law enforcement policies, population characteristics and attitudes all contribute to variation in reported data.

Some general factors which may affect the amount of crime reported and type of crime committed are:

1. The density and size of the community population and of its surrounding area.
2. The variations in composition of the population, particularly to age.
3. The economic status, education and recreation characteristics of the community population.

4. The relative stability of the population, including commuters, seasonal, and other transient types.

5. The climate, including seasonal weather conditions, and other geographical variations.

6. The religious characteristics of the population.

7. The effective strength of law enforcement agencies.

8. The policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational).

9. The attitude of the public toward law enforcement problems.

10. The crime reporting practices of the citizenry.

11. The administrative and investigative follow-up of the local law enforcement agency, including the degree of adherence to crime reporting standards.

WUCR STATISTICAL INTERPRETATION

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often, numbers of the type in this report are used incorrectly to draw conclusions that the statistics simply do not support. In order to avoid this error, it is necessary to know what information is included and how it is reported.

To obtain accurate information from many different agencies, the National UCR Program has to precisely define the methods for counting such information as the number of offenses, arrests, clearances and value of stolen or recovered property. The methods of counting and some resulting limitations are explained below.

Classification of Offenses

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important

to keep in mind because different information is collected for each. Part I offenses include (1) Violent Crimes: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault; and (2) Property Crimes: burglary, larceny-theft, motor vehicle theft and (since January, 1979) arson. These reported Part I offenses comprise the FBI Crime Index. All other offenses are classified under Part II offenses.

Part I offenses are used to calculate the Crime Index and Crime Rate.

All offenses are classified on the basis of law enforcement investigation in accordance with UCR offense definition (which are NOT necessarily identical to the Revised Code of Washington definitions). Because WUCR identifies and tallies a police problem, offense classifications are not based on the findings of a court, medical examiner, jury or other judicial findings.

Counting the Offenses

The number of offenses is counted only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, forcible rape, aggravated assault, one offense is counted for each VICTIM, regardless of the number of offenders involved.

For robbery and larceny, one offense is counted for each distinct OPERATION which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For

example, if 20 people are robbed in a bar at the same time, only ONE offense has occurred. However, if that robber leaves the bar and holds up a passerby, a second offense has occurred. For burglary, one offense is counted for each structure which is illegally entered. However, when the structure is an apartment house, business, or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

NOTE: Attempts to commit any of the Crime Index offenses are counted as actual offenses, except that attempts to kill and assault to kill are counted as aggravated assaults.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. Part I crimes are ranked according to seriousness and appear in order from most serious to least serious crimes. Example: A robber takes a man's wallet and then beats him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by UCR to be more serious, only the robbery is counted. This is known as the **HIERARCHY RULE.** From one perspective, this method of counting seriously understates the crime problem, but from another, it prevents undue inflation of crime statistics.

NOTE: 1. Arson is an exception to the above rule and is counted separately from other offenses.

2. The number of offenses is not counted for Part II offenses.

Arrests

Arrest information is collected for all Part I and Part II offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because the arrest totals count all offenders arrested for each offense, and clearance-totals count only the offense for which an arrest or arrests have occurred.

Clearances

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender commits suicide, makes a dying declaration, confesses while in custody or serving time for another crime, is prosecuted in anothe jurisdiction for the same offense, is a juvenile who is handle notifying the parents, or when the victim refuses to prosecut another jurisdiction refuses to extradite the offender, etc..

Clearances are counted as "adult" and "juvenile". A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles result in a clearance, it is counted as an "adult" clearance.

NOTE: Not all crimes are cleared within the calendar year in which the offense occurs.

Information Grouping

The crime statistics reported by an individual agency indicate what is happening in one particular area, but to make rational comparisons

among a number of jurisdictions, communities with similar characteristics need to be grouped together. It may be important to know how a city compares with cities of similar size, or how patterns of crime differ in various types of communities. Grouping agencies with similar characteristics allows these determinations to be made. Aside from being merely interesting, such comparative analysis provides the basic information for long-range criminal justice planning.

WUCR groups jurisdictions on the basis of population size in this report, and if any types of comparisons are to be made the reader should also consider what type of community is is that is being compared. Grouping by population size considers only the population of the relevant area in this report. It does not consider proximity to a major metropolitan area in spite of the fact that widely different crime patterns could be expected in a city of 30,000 which is a suburb of Seattle or Tacoma and one which is in a rural area. In this report, grouping by population does not take into account the urban/suburban/rural character of the area, and includes a wide range of populations in each category. For use in interpreting this report, the WUCR grouping systems are listed below:

POPULATION GROUPINGS - CITIES, TOWNS AND SHERIFFS DEPARTMENTS

GROUP	POPULATION
1	Over 250,000
2	100,000 to 250,000
3	50,000 to 100,000
4	25,000 to 50,000
5	10,000 to 25,000
6	5,000 to 10,000
7	2,500 to 5,000
8	Under 2,500

CRIME INDEX

The Crime Index is a basic measure of crime which can be used for comparing the extent of crime among cities, counties and states of similar size. The Index is simply the total number of certain offenses that occur in a given area in a given calendar period (usually quarterly and annually). The offenses are murder and non-negligent homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft and arson -- all of the Part I offenses except simple assault and manslaughter by negligence.

The offenses were selected as indicators of the total amount of criminal activity because they are serious offenses that are the focus of widespread concern. They occur with sufficient frequency to reflect fluctuations in the overall level of criminal activity. They are most likely to be reported and reported accurately, to the law enforcement officers due to their seriousness. They are offenses that can clearly and specifically be defined.

Notwithstanding its usefulness, the Index does have limitations. The relationship between the Index offenses and total criminal activity, both reported and unreported, has never been firmly established. The varying severity of offenses is not taken into account, resulting in equal weight being given to a shop lifting and a forcible rape. Furthermore, the actual incidence of crime in a city may not be accurately depicted by the Index if the majority of the city's crime involves non-Index offenses such as gambling and narcotics.

CRIME RATE

The Crime Rate is based on the Index, but adjusts the Index for variances in population by indicating the number of Index offenses for each 1,000 persons (other base population increments may be used such as the number of Index offenses per 100,000). This means that comparisons may be made among several areas with different populations, or within one area with different populations over a period of time, without the information being biased by population differences. For most general comparisons, the Crime Rate is probably the most accurate to use.

To calculate the Crime Rate, first divide the population of the area by 1,000, and divide the Crime Index by that answer. For example, if a city has a population of 273,000 and a Crime Index of 21,257 the calculations would be:

1. 273,000 divided by 1,000 = 273.00
2. 21,257 divided by 273.00 = 77.86

Thus, although the city's Crime Index is 21,257, its Crime Rate (the number of crimes for each 1,000 people) is 77.86.

ARSON

Arson is defined under the Uniform Crime Reporting program to include any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc. The Hierarchy Rule does not apply to the offense of arson. Any other Crime Index offenses occurring in conjunction with an arson should be reported in accordance with the Hierarchy Rule. The arson offense should be reported on the "Monthly Return of Arson Offenses Known to Law Enforcement."

In October, 1978, the United States Congress passed legislation that mandated arson be classified as a Part I Crime Index offense in the Uniform Crime Reporting program. On October 12, 1982, Public Law 97-298 was signed into law by the President, directing that the offense of arson be permanently classified as a Part I Crime.

There were 1824 arson offenses reported to the WUCR program in 1984. This is 69 less or a 3.6% decrease from 1983. In the total number of arsons reported, 1266, or 67.2%, involved structural property; 292, or 16.0% involved mobile property; and 306, or 16.8%, involved other property. "Other" property includes crops, timber, fences, signs and any property stored in outside structures. Only 5.9% of the structural property burned was uninhabited, abandoned, or not normally in use. Property damage due to arson totaled $24,427,981, which is $1,931,492 more, or a 9% increase in estimated damage compared to 1983. In estimated damages, $23,148,775, or 94.8%, was structural damage; $1,167,540, or 4.9%, was mobile damage; and $111,666, or 0.3%, was in the "Total Other" damage category. Washington Law enforcement agencies cleared 25.1% of the arson offenses reported.

WASHINGTON ASSOCIATION OF SHERIFFS & POLICE CHIEFS

"IN MEMORIAM"

Detective Michael L. Raburn, age 38, of the King County Department of Public Safety was fatally stabbed through the heart with a sword on March 27, 1984. The 12 year veteran was attempting to enter an apartment in Seattle to evict a tenant per a King County Superior Court Writ of Restitution. The offender barricaded himself in the apartment and was fatally wounded several hours later by officers who were attempting to arrest him.

"IN MEMORIAM"

Wildlife Agent, Terry Hoffer, age 36, of the Washington State Department of Game, was fatally shot by an 8 mm rifle on November 10, 1984. The 8 year veteran was shot while sitting behind the steering wheel after he and his partner had stopped a vehicle occupied by two hunters while on game patrol in the St. Regis timber lands in Pierce County. One of the occupants attempted to unload the rifle which discharged. The bullet passed through the side of the canvas top, entered the Game Department's patrol vehicle on the driver's side and striking Wildlife Agent Hoffer.

The person with the loaded rifle has pled guilty to second degree manslaughter and tampering with a witness.

WASHINGTON ASSOCIATION OF SHERIFFS & POLICE CHIEFS

"IN MEMORIAM"

Officer Nicholas N. Davis, age 39, of the Seattle Police Department was fatally shot on December 18, 1984. The 10 year police veteran was advised by a restaurant employee that a customer had just left the premises without paying for a $4.55 meal bill. The officer confronted the suspect, an altercation ensued, during which the suspect wrestled the officer's service revolver from him and shot him twice.

The suspect has been charged with nomicide. He subsequently was found to be incompetent to stand trial, and was committed to Western State Hospital for evaluation. He has a history of mental problems dating back to 1975 and determined to be insane at the time of the fatal shooting.

LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

Law enforcement officers may become victims of assault as a consequence of their occupations. The Uniform Crime Report addresses all assaults on officers which involve "more than mere verbal abuse or minor resistance to an arrest."

In 1984, three law enforcement officers were feloniously killed in the line of duty, compared to one in 1983.

In 1984, contributing agencies reported 1372 officer assaults with 32.7% of the total assaults resulting in personal injury to the officer. The type of activity in which an officer was most likely to be assaulted was responding to a "disturbance call", which accounted for 31.6% of the total officers assaulted. Other activities of significance include: attempting other arrests, 23.1% of the total; traffic pursuits and stops, 10.7% of the total; and handling, transporting and custody of prisoners, 7.9% of the total.

Hands, fists and feet were used in 85.3% of the assaults, followed by other dangerous weapons 7.4%, firearms 3.9%, and knife or cutting instrument 3.4%. The type of assignment where most assaults occurred was a one-person vehicle resulting in 540 assaults or 39.4%, followed by a two-person vehicle when the officer was assisted, 256 assaults or 18.7%. During a 24-hour period using 8-hour shifts, 8 p.m. to 4 a.m. reflected the most assaults, 823 assaults or 60.0% with the least occurring between 4 A.M. to 12 P.M., 140 assaults or 10.2%.

Combining these factors, an officer stands the highest risk of assault when responding to a disturbance call between the hours of 8 P.M. and 4 A.M., in a one-person vehicle with the offender using his hands, fists or feet as a weapon.

During 1984, police assaults were cleared (by arrest or exception means) 94.2% of the time.

WUCR GLOSSARY

ACTUAL OFFENSE:

An offense which law enforcement personnel confirm to have happened.

ADULT:

A person 18 years of age or older at the time of committing a crime.

ALL OTHER OFFENSES:

State and local offenses not otherwise specified.

ARRESTS:

The act of taking a person into custody by authority of law to charge him or her with a criminal offense. An adult arrest should be reported when a law enforcement officer detains an individual with the express intent of seeking charges against this person for a specific criminal offense(s) and a record is made of the detention.

ARSON:

Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc...

ASSAULT, AGGRAVATED:

An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. All assaults by one person upon another with the intent to kill, maim, or inflict severe bodily injury with the use of any dangerous weapon are classified as aggravated.

ASSAULT, SIMPLE:

An unlawful attack or attempted attack by one person upon another in which no weapon was used and which did not result in serious or aggravated injury to the victim.

BURGLARY:

The unlawful entry of a structure to commit a felony or a theft.

CLEARANCE:

The solving of an offense by arrest or in some circumstances, by exceptional means.

CLEARANCE RATE:

Percentage of the total crimes cleared compared to the number reported.

Example:

a. Number of robbery clearances, 38
b. Number of total robberies, 72
   Divide: 38 by 72 = .528
   Multiply: .528 X 100 = 52.8
